

**Es ist nicht der Virus den Sie fürchten
sollten sondern die Impfung**
**Wenn Sie einen Grund für
organisierten und massiven Widerstand
gegen diese Impfung gesucht haben, dann
haben Sie ihn spätestens jetzt gefunden.**

Hier sind die FAKTEN

<http://www.rense.com/general87/ilmn.htm>

KEEPING A PROMIS

According to ex-LAPD drug enforcement officer, [Mike Ruppert](#), this amazing computer software called PROMIS was: "Created in the 1970s by former National Security Agency (NSA) programmer and engineer Bill Hamilton, now President of Washington, D.C.'s Inslaw Corporation, PROMIS (Prosecutor's Management Information System) crossed a threshold in the evolution of computer programming. Working from either huge mainframe computer systems or smaller networks powered by the progenitors of today's PCs, PROMIS, from its first "test drive" a quarter century ago, was able to do one thing that no other program had ever been able to do. It was able to simultaneously read and integrate any number of different computer programs or data bases simultaneously, regardless of the language in which the original programs had been written or the operating system or platforms on which that data base was then currently installed."

For purposes of our discussion, however, one needs to know and understand that "PROMIS" software has been modified and greatly expanded from its original 1972 prototype. We need to track and document the software's evolution which eventually allowed the MAPPING AND COMPLETE DETAILED SEQUENCING of DNA and RNA strands the very CODE OF LIFE. **Once this is understood, one can better understand exactly HOW scientists in top-secret U.S. Government labs were able to successfully resurrect the deadly killer virus of 1918, place it in human plasmid cells, and ultimately to a killer, time-released VACCINE.**

Keep in mind, this is not myth, it is not speculation, it is not science fiction. It is all fact and completely documented, even though you may not have heard about it in the mainstream news. The PROMIS software eventually evolved into very bio-chemistry-specific versions named "Daylight" and "Oracle8i".

This **PROMIS software** evolution is best understood by reading [THE LAST CIRCLE](#) by Cheri Seymour, aka Carol Marshall particularly the 15th chapter. This chapter reveals the contents of files provided to Seymour by **PROMIS** program-modifier Michael Riconosciuto documenting the history of Ft. Detrick's biological warfare development and the stated desire of our nation's top "National Institutes of Health" and CDC scientists to use new computer technologies to create sophisticated "Designer Viruses" for covert CIA use. He also documents the INFILTRATION of **ISRAELI AGENTS** into the labs of **Ft. Detrick**.

Riconosciuto's "modifications" are so "sensitive to national security" that Riconosciuto was placed into forced detention in a high-security federal prison not because any "crime" had been committed but to keep him from being kidnapped by other competing "multi-national group's" interests.

According to Riconosciuto's files, the NEW GENERATON of **PROMIS software**, today trademarked as **DAYLIGHT and ORACLE8i** are unbelievably complex, and have exhibited incredible ARTIFICIAL INTELLIGENCE capabilities as portrayed so well in the movie, "Eagle Eye".

ORACLE8i not only has the ability to rapidly analyze gene clade sequencing in viruses and bacteria in mere minutes, it can build a model of a complex new viral structure just as quickly, and can calculate to the minutest detail its possible "drift" of mutations after its release. This software can not only predict the DEATH TOLL the virus would produce, but also the accurate final numbers of its genetic mutations over a given period of time. In short, this software can indeed control a complex GENOCIDE AGENDA in the form of an engineered, worldwide VIRAL PANDEMIC from beginning to end Alpha to Omega.

Evidence suggests that this agenda was indeed systematically set in motion in March of 2009.

As powerful as this software system is, there are some limitations, however. The first limitation is that a SAMPLE killer virus needed to be provided first so that ALL PARAMETERS OF HOW AND WHY IT KILLED SO EFFICIENTLY COULD BE DETERMINED BY THE COMPUTER.

This is what happened when Jeff Taubenberger's team successfully isolated a completely intact sample of 1918 killer virus from a frozen victim of the virus in Brevig Alaska in 1997. With this "sample" the computer could do its trillions of complex analyses, all that Taubenberger and Terrence M. Tumpey needed to do was keep the CIA and the Israeli MOSSAD bosses informed of the ORACLE's final assessments and projections.

Die Methode

As Michael Ruppert declares: "

What would you do if you possessed software that could think, understand every language in the world, that provided peep holes into everyone else's computer "dressing rooms," that could insert data into computers without people's knowledge, that could fill in blanks beyond human reasoning and also predict what people would do - before they did it? You would probably use it wouldn't you?"

In the area of WORLD DEPOPULATION and EUGENICS as prescribed by Hitler's financial backers in Wall Street and London **such a computer program would be indispensable. The evidence that this has in fact been accomplished, and the "viral genie" has indeed been released from the bottle, is simply overwhelming.**

Let's examine this evidence.

NOVARTIS PHARMA, BASEL SWITZERLAND CONTROLS THE SOFTWARE

Fellow researcher [Don Nicoloff](#) has helped immensely in assembling the paper trail of this Artificial Intelligence software called **DAYLIGHT** and **ORACLE8i** and in detailing how it is being used to create the ULTIMATE UTOPIA OF THE ILLUMINATED ONES on planet earth. Not surprisingly, since the world of the Global Elite is really quite small and inter-connected, other, seemingly unconnected world news stories find their way into this massive web of deception.

This trail leads us to a "Dr. Orly Taitz" and her husband, Yosef. As Nicoloff declares: "Taitz, a practicing dentist, attorney, and licensed real estate agent who

lives in Southern California's posh, coastline community, Mission Viejo, has filed numerous lawsuits and legal motions on behalf of former U.S. Senate candidate Alan Keyes (and others) demanding proof of Barack Hussein Obama, Jr.'s (aka Barry Soetoro, et al) citizenship eligibility to serve as president of the United States. Taitz recently published 'proof' that she had standing to practice law before the U.S. Supreme Court and claims to have "met personally" with Chief Justice John Roberts."

Nicoloff then writes: "**Yosef Taitz**, the self-described "CEO" of Daylight Chemical Information Systems, Inc., a private software company located in Mission Viejo, CA, Santa Fe, NM, and Cambridge, England. DCIS, Inc. is intimately involved with Novartis Pharmaceuticals (United States, Switzerland, Germany, France, England), the patent holder of the bird/swine flu vaccination. The "DayCart" software produced by DCIS, Inc. integrates ongoing research and development by Novartis and others using proprietary Oracle 8i technologies."

What Nicoloff fails to mention, however, is the fact that Novartis' patent specifically details that the viral pathogen which the patented vaccine is designed to protect against is a "reverse engineered" designer virus that could only have been created in the labs of Ft. Detrick utilizing **ORACLE 8i** equipped computers. This is EXACTLY what Michael Riconosciuto testified about years earlier concerning the Biological Warfare capabilities of **ORACLE 8i software**.

Make no mistake, utilizing their proprietary computer software, **NOVARTIS** created the very virus now endangering the world, then has manipulated the World Health Organization (which the original PROMIS Software helped to create along with the "World Bank") into issuing "PANDEMIC LEVEL 6" alerts, which in turn created an INSTANT GLOBAL MARKET FOR BILLIONS OF VACCINE DOSES. **Clearly, Novartis' investment into ORACLE 8i software is set to pay off very handsomely indeed.**

According to the China-based MANUFACTURING ARM of Novartis' International, the Chemical Information Network or ChIN (anagram for "ChINa") we read the following world-wide press release:

DAYLIGHT CIS announces DayCart

DER TÄTER

DayCart(tm) introduced by DAYLIGHT

Mission Viejo, Calif. USA - July 14, 2000 -- DAYLIGHT Chemical Information Systems, Inc. (USA) today introduces a new addition to the array of DAYLIGHT software products; DayCart(tm), an application using the unique extensibility features of Oracle8i(tm) designed to fully integrate the molecular structures and reactions in an Oracle8i database server environment. As an integrated module DayCart does not require any call-outs or other operations outside of the Oracle server, in order to perform its functions. DayCart delivers the speed, capacity and performance of Daylight tools throughout the organization. Use of DayCart with the Oracle8i server, unlocks the access of existing Oracle* applications and tools (such as SQL, PL/SQL, Java, C, etc.) to the array of chemical information.

"DayCart was developed in close collaboration with Novartis' scientists and the architects of Oracle8i's extensibility framework. Thus, DayCart provides a practical and exceptionally efficient solution fully compliant with Oracle technology.

Today **DayCart** delivers an extensive range of chemical information capabilities, such as fast direct storage and retrieval of 2D and 3D, structures, reactions and mixtures. Operations provided include high performance searching of full structure, sub-structure, super-structure, similarity and other structural operations. Our utilization of Unique SMILES and its indexing, delivers unparalleled speed and flexibility in storing, novelty checking and searching operations," stated **Yosef Taitz**, Chief Executive Officer of DAYLIGHT.

"Utilizing the **DayCart technology** today, we deliver a corporate compound registration system handling archival, searching and retrieval of over 9 million compounds with lightning speed. A wide range of **DayCart** solutions are being produced, both by **Daylight** and by its development partners. We are providing a migration path for conversion and integration of existing data. **Daylight chemical technology**, tightly integrated with the **Oracle8i database** opens the door to groundbreaking 'informatics' solutions. This technology empowers users to bridge and expand the horizons of chemical information science, merge biological and chemical data, and provide solutions for data warehousing, compound acquisition, and more."

"The Oracle database is unique in its ability to singularly store, manage and secure relational data, files and unstructured data," said Jeremy Burton, senior vice president of iPlatform marketing, Oracle Corp. "By extending these data management capabilities, as **DAYLIGHT Chemical Information Systems** has with **DayCart**, technology continues to drive significant business and scientific advances. We are pleased to be a fundamental part of these advances."

"The Daylight Cartridge combines strong performance with interesting versatility through **Daylight's** typical toolkit approach. It enables Pharma R&D IT functions to adapt their systems flexibly to the new challenges in the business and scientific environments." Said Dr. Rene Ziegler the Head of Pharma Research Information Management at Novartis.

DAYLIGHT Chemical Information Systems, incorporated in 1987, is a privately held company headquartered in **Mission Viejo, CA**, with a research office in Santa Fe, NM and in Cambridge England. DAYLIGHT is a technology leader who provides high-performance chemical information processing tools (such as SMILES and Daylight ToolKit(tm)) for research chemists around the globe. Its software and tools are used by thousands of scientists at over 250 companies worldwide. For more information please e-mail to: info@daylight.com and visit DAYLIGHT's homepage at www.daylight.com

There it is. This engineered pandemic is a heinous crime against humanity. I submit that this paper, combined with the others I have authored, fulfills the legal requirements of a criminal prosecution of suspected murderers. I have established motive (windfall profits), opportunity, and finally, the means and methods employed to commit this crime.

The only question remaining is:

**IS THERE A U.S. ATTORNEY BRAVE AND COURAGEOUS ENOUGH TO
SEEK GRAND JURY INDICTMENTS AGAINST THESE MASS
MURDERERS???**

True Ott, PhD, ND
